NOISELESS RINGS.

GUTTA PERCHA CURTAIN and CORNICE RINGS.—These Rings have been much approved by the Faculty, particularly for nervous and aged patients. Owing to the peculiar properties of Gutta Percha, these rings do not make a noise when drawn along the pole or rod. The following sizes may be had, either with or without loops:—Size 1 inch diameter, ¾ inch ditto, 2 inch ditto, 1½ inch ditto, 1 inch ditto, ¾ inch ditto.

TUBING, LINING FOR TANKS, ORNAMENTAL MOULDINGS, &c. manufactured by the GUTTA PERCHA COMPANY (Patentees), 18, Wharf-road, City-road, London.

STEPHENS'S PATENT PROPELLING PENCILS.—A new kind of ever-pointed Pencil in Wood, lined throughout with lead, requiring no cutting, as the lead is propelled to the point by a novel, easy, and ingenious contrivance; is more economical than even the wood pencil, which is destroyed as used, whereas in these pencils the lead only is consumed, the pencil remaining as perfect as at first, ready to be refilled, and this is required only at long intervals. Prepared and sold by the Proprietor, HENRY STEPHENS, 34, Stanhope-street, Clarendon-road, Lond-n. Sold by Stationers and Stationers; where also may be had his Writing Fluids, peculiarly adapted to Steel Pens.

FIRE-PROOF CONSTRUCTION.—FOX and BARRETT'S PATENT.—The great importance of fire-proof construction is shown by the recently published returns of fires in London during the past year, by which it appears that there is a considerable increase as compared with former years, the number annually exceeding 1,000, or an average of three per day.

This result affords strong corroboration of a fact stated upon high authority, THAT NO BUILDING IN WHICH TIMBER JOISTS ARE USED IS PRACTICALLY SECURE FROM THE DANGER OF FIRE; and when this fact is taken in added that timber is also liable to dry rot and the ravages of insects and vermin, for which it affords a ready harbour, the mischief arising from its extensive use will be sufficiently apparent.

It becomes, then, worth the attention of those who are interested in building, to inquire whether materials of an incombustible nature cannot be substituted for timber in the construction of floors, &c., without involving additional cost; and attention is invited to a number of buildings of all classes, either finished or in course of erection, upon the above improved system, in which joists, either of rolled or cast iron, are substituted for timber, together with a solid superstructure of concrete, adapted to receive a flagged surface of floor or roof of any kind.

Among the buildings at present in progress in London on this system is the new GUY'S HOSPITAL, an extensive range providing accommodation for 200 additional beds; and for buildings of this description and manufactories, as well as for PRIVATE DWELLING-HOUSES, OFFICES, WAREHOUSES, &c. it possesses very great advantages.

A detailed description of the system, estimates, and all further information, may be obtained on application to the Proprietor of the patent,

Mr. BARRETT (late Fox and Barrett),
12, York-buildings, Adelphi,

whose offices form part of a building erected on this principle, and where specimens of the rolled iron joists may be seen.

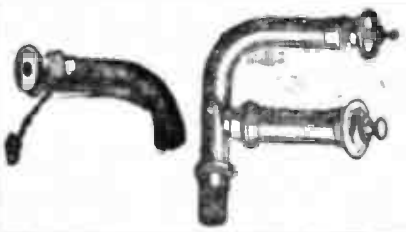
Undertake the entire BUILDING, RESTORATION, AND FITTING OF CHURCHES, &c. &c.

including every kind of CARVING IN WOOD, STONE, OR ALABASTER; which important part of those works he is fully prepared to execute in a PROPER STYLE AND CHARACTER, suited to the period of the design, and to introduce THE TRUE SPIRIT AND FEELING OF ANCIENT WORKS and for any of which ESTIMATES WILL BE GIVEN AT THE SHORTEST NOTICE.

N.B.—TWO OR THREE GOOD WOOD CARVERS WANTED.



WHISHAW'S REGISTERED IMPROVED TELEKOUPHONON FOR SPEAKING-PIPES.

By means of this invention speaking-pipes may be rendered more generally available for Public Buildings, Club Houses, Noblemen's Mansions, City Warehouses, Offices, &c. &c. It consists of a whistle-mouthpiece of ivory, wood, or metal, with an indicator attached, by means of which, in case of two or more speaking-tubes being carried into one room, the mouthpiece from which a whistle proceeds is readily ascertained.

The newly-registered invention also embraces a plan (as shown in the right-hand figure annexed) to supersede the necessity of blowing into a speaking-pipe when the whistle at the further end is required to be sounded.

Manufactured solely by KEPP and COMPANY, 46, Cl., and 13, Chandos-street, Charing-cross;

And to be had retail of all respectable ironmongers.
